

Full pipeline — swimlane data flow

Onboarding through operations across Front-end/Chatbot, Data/Solar Modeling, Backend + Postgres, Blob Storage, the EPC Marketplace, and Operations. NDA signs at Viability; utility-bill authorization is requested at Feasibility.

Viability stage — why it's two parallel tracks

The Project Management operator's outreach and the Solar Technical model run fire off the same `site_submitted` event and proceed asynchronously — neither waits on the other.

Core entity relationships (revised)
